

...products for many different applications

CoreDry

An innovative method of drying field and laboratory core samples in minutes so that you can obtain accurate density results, ASTM D7227.

CalPlus

Windows-based calibration software for all brands and models of CPN, InstronTek, Humboldt and Troxler nuclear gauges.

...high quality parts and services for all nuclear gauge brands

**501DR
Depthprobe**

Subsurface (down-hole) density/moisture measuring probe for soils engineering and profile investigation, ASTM D5220 and D5195.

**AC2-R
Asphalt
Content Gauge**

Table-top (portable) instrument for determining asphalt content of asphaltic concrete, ASTM D4125.

MC-3 Portaprobe

Large-screen density/moisture measuring gauge for compaction control of all road construction materials, ASTM D6938.

CoreLok

The most versatile density system in the world for measurement of compacted asphalt, loose asphalt and aggregate samples, ASTM D6752, D6857, D7063.

Laser_CTE

An automatic laser based device for measurement of Coefficient of Thermal Expansion of concrete.

**Xplorer
3500**

An easy-to-use, rugged and affordable moisture density gauge that is designed to provide superior performance, ASTM D6938.

**MC-1DRP
Portaprobe**

Basic density/moisture measuring gauge for compaction control of all road construction materials, ASTM D6938.

**MCM-2
Hydrotector**

A non-destructive instrument for measuring entrapped moisture in thermal insulation of pipes and vessels. A preventative maintenance tool for petroleum and chemical plants.

**MC-S-24
Stratagauge**

Dual probe density/moisture measuring gauge for RCC dams and other layer (strata) testing.

**503DR
Hydroprobe**

Subsurface (down-hole) moisture measuring probe for irrigation management, ASTM D5195

Rutmeter

Tabletop, asphalt rutting susceptibility measuring instrument. Non-destructive testing of Marshall and Superpave samples, dry or immersed in water.

StripScan

An instrument to quickly measure anti-strip liquid additives in asphalt mixtures and binders.

IPC SPT

Asphalt performance tester that measures dynamic modulus, flow number and flow time, NCHRP 9-19 and 9-29.

Validator

A portable NIST-traceable device for verification and re-calibration of all brands of moisture density nuclear gauges.
